SUMMARY

Full-Stack Developer & Software Architect specialized in modern web apps and high-fidelity UI/UX integration. Expert in high-performance APIs (FastAPI, PostgreSQL), Generative AI (RAG, LLMs), Web Scraping, and Docker. Highly curious, organized, and solution-oriented, I leverage strong empathy, teamwork, and a continuous learning mindset to deliver clean, user-centric systems. Driven by a spirit of innovation and continuous learning, I am always looking for new opportunities to push the boundaries of what's possible.

TECHNICAL SKILLS

Python	■ ■ ■ ■ ■	TypeScript	■ ■ ■ ■ ■

PROFESSIONAL EXPERIENCE

Front-End Developer

July 2025 - April 2026

Aetheris-DNA - Freelance

- Redesigned and integrated a corporate website for Web Compagnie France based on client-provided mock-ups, following UX/UI standards and web best practices.
- Developed and integrated interfaces connected via APIs with a Drupal-based CRM, ensuring user data synchronization.
- Integrated websites for Aetheris LTD and Aetheris DNA with modern and responsive designs.
- Implementation of a Headless architecture linking the website to Odoo to centralize contact capture, customer project tracking, content management (blog & SEO) and CRM workflow automation.
- Tech: Odoo, Drupal, TypeScript, Next.js, React.js, GSAP, Infomaniak

Full Stack Developer

January 2024 - January 2025

Synergie Mad - Remote

- Designed and developed Didache, a church encyclopedia application featuring a timeline, interactive map, and AI-assisted chat.
- Developed Gnose AI, a conversational web platform with AI capable of analyzing user-submitted corpora and PDF files.
- Contributed to OpenMyst, a platform simulating the life of Jesus, integrating a 3D map, timeline, and genealogical tree.
- Tech: Python, Flask, TypeScript, Next.js, React.js, Firebase, Force Graph 3D, Mapbox, PostgreSQL, Stripe, OpenAI API, AWS S3

Full Stack Python Developer

July 2023 - November 2023

FPay - Andohalo

- Contributed to the development of Jupiter by working on authentication, database structuring, and front-end integration.
- Developed an API to trigger USSD codes for mobile money transfers, enabling accessible financial transactions.
- Built a lead generation tool to support prospecting and improve SEO performance for client websites.
- Developed web scraping scripts for automated data collection to support business intelligence and marketing strategies.
- Tech: Python, Flask, TypeScript, React.js, Firebase, Stripe, MVola API

IT and Multimedia Technician

September 2021 - June 2023

Shine Evangelical Church Office - Andravoahangy Ambony

- Designed and developed a nationwide church management application covering parishes, departments, and prayer cells (Shine Church Madagascar).
- Implemented a QR code generation and scanning system for invitation validation during events.
- Edited sermon videos and designed DVD covers and stickers.
- Created multimedia materials such as flyers, greeting cards, and Bible covers for events.
- Tools: Next.js, PostgreSQL, Adobe Premiere, Photoshop, Figma

IT Technician Intern

January 2020 - November 2020

Ministry of Technical Education and Vocational Training - Ampefiloha

- Developed an online library with video course pages and a PDF reader to enhance user experience and accessibility.
- Implemented a firewall system with employee authentication via Active Directory, connection filtering, and local deployment.
- Tech: PHP, Angular, TypeScript, Bootstrap, MySQL, pfSense, Debian
