SUMMARY

As a Computer Science and Telecoms graduate with 5 years of experience, my journey is driven by a relentless pursuit of scalable, future-proof architectures. I don't just write code; I orchestrate complex structures like monorepos and microservices. My day-to-day workflow is amplified by deeply integrating AI and specialized MCP configurations to accelerate development. Yet, my true strength lies in a steadfast philosophy: man always retains absolute control over the machine. I leverage AI for radical speed and fluidity, while personally ensuring every line of code remains pristine, optimized, and built to last.

TECHNICAL SKILLS

TypeScript	★★★★★	Next.js	★★★★★	Python	★★★★★
Flask	★★★★☆	PostgreSQL	★★★★☆	Rust	★★★★☆
Docker	★★★★☆	CI/CD	★★★★☆	GitHub/GitLab	★★★★☆

Vocational Training Certificate (BEP) Institut D'Enseignement Technique à Amboanjobe	October 2015 - July 2016

PROFESSIONAL EXPERIENCE

Front-End Developer Aetheris-DNA - Freelance	July 2025 - June 2026
- Redesign and integration of a showcase website for Web Compagnie France from a mockup provided by the client, adhering to UX/UI standards and web best practices. - Development and integration of API-connected interfaces with a Drupal-based CRM, ensuring synchronization of user data. - Integration of websites for the entities Aetheris LTD and Aetheris DNA, implementing new modern and responsive designs. - Implementation of a communication system between the website and Odoo CRM for automated collection, storage, and management of leads (client emails and messages). - Tech: Odoo, Drupal, TypeScript, Next.js, React.js, GSAP, Infomaniak	
	January 2024 - January 2025

Full Stack Developer

Synergie Mad – Remote

- Design of the Didache application, an encyclopedia of the Church, integrating a timeline, an interactive map, and an AI-assisted chat.
- Development of the Gnose IA web application, a conversational platform equipped with an AI capable of analyzing user-submitted corpora or PDF files.
- Participation in the creation of the OpenMyst application, a platform simulating the life of Jesus where I integrated a 3D map, a timeline, and a family tree.
- Tech: Python, Flask, TypeScript, Next.js, React.js, Firebase, 3D Force Graph, MapBox, PostgreSQL, Stripe, OpenAI API, AWS S3

Python Full Stack Developer

July 2023 – November 2023

FPay – Andohalo

- Contributed to the development of Jupiter, working on authentication, database structuring, and front-end integration.
- Development of an API to trigger USSD codes for money transfers via mobile money, facilitating accessible financial transactions.
- Development of a lead generation tool to facilitate prospecting and SEO optimization of client sites, improving their online visibility.
- Writing web scraping scripts for automated collection of relevant data, supporting business intelligence and marketing strategies.
- Tech: Python, Flask, TypeScript, React.js, Firebase, Stripe, and MVola API

IT and Multimedia Technician

September 2021 – June 2023

Bureau Église Évangélique Shine – Andravoahangy Ambony

- Design and development of a church management application, including parishes, departments, and prayer cells at a national scale (Shine Church Madagascar).
- Implementation of a QR Code generation and scanning system for invitation validation during religious events.
- Video editing of the pastor's sermons and design of jackets and stickers for DVD media.
- Creation of multimedia materials such as flyers, greeting cards, and Bible covers for religious events.
- Tools: Next.js, PostgreSQL, Adobe Premiere, Photoshop, Figma

IT Technician Intern

January 2020 – November 2020

Ministère de l'Enseignement Technique et de Formation Professionnelle – Ampefiloha

- Development of an online library, integrating a video course page and a PDF reader to improve user experience and accessibility.
- Implementation of a firewall with employee authentication via Active Directory, connection filtering, and local deployment of the application.
- Tech: PHP, Angular, TypeScript, Bootstrap, MySQL, pfSense, Debian
